join@enlighten.energy

Cracow, Poland

enlighten.energy is an innovative digital platform transforming the energy efficiency and energy technology industry. We empower consumers with knowledge and real-time access to their energy usage. Our mission is to help consumers understand energy-efficient alternatives, which will help reduce their energy bills and environmental footprint.

We are a spin-off company from **Intelligent Green Solutions**, which successfully introduces new renewable energy related products. We develop **enlighten.energy** project around our R&D center **IGS Innovation Poland** in Cracow.

Our team:

- **Chief Executive Officer** – Adam
- **Chief Operating Officer** – Stephen
- **Director of Marketing and Communications** – Lara
- **Marketing Assistant** – Sabina
- **Smart Metering Engineer** – Paweł
- **Software Developer Intern** – YOU!

The project will constantly evolve with new modules and functions to be incorporated into the ecosystem. **enlighten.energy** is looking for an enthusiastic software developer intern that has the ability learn on the spot and is looking to gain experience.

The **Software Developer Intern** will be responsible for contributing to the architecture of **enlighten.energy** software ecosystem. This will include following the project's framework, version control, workflow tools, and development strategy for the software team.
