join@enlighten.energy

Cracow, Poland

enlighten.energy is an innovative digital platform transforming the energy efficiency and energy technology industry. We empower consumers with knowledge and real-time access to their energy usage. Our mission is to help consumers understand energy-efficient alternatives, which will help reduce their energy bills and environmental footprint.

We are a spin-off company from **Intelligent Green Solutions**, which successfully introduces new renewable energy related products. We develop **enlighten.energy** project around our R&D center **IGS Innovation Poland** in Cracow.

Our team:

- **Chief Executive Officer** – Adam
- **Chief Operating Officer** – Stephen
- **Director of Marketing and Communications** – Lara
- **Marketing Assistant** – Sabina
- **Technology Team Lead** – Paweł
- **Full Stack Software Developer** – YOU!

The project will constantly evolve with new modules and functions to be incorporated into the ecosystem. **enlighten.energy** is looking for an enthusiastic software developer that has ability learn on the spot and is ready to contribute to the team and learn together with its members.

The **Full Stack Software Developer** will be responsible for contributing to the architecture of **enlighten.energy** software ecosystem. The candidate must present strong organizational skills and the ability to work independently. Also, it would be required to become an “architect” of the project’s framework and development strategy as it grows in time. Keeping track of the software’s version control and workflow tools.
